

Planted: 5/12/2014
Harvested: 9/23/2014
Hybrid: DK 6108
Soil: Clay, Loam
Previous Crop: Soybeans

Plot Size: 4 rows, 27.5', 30", 4 replications
Tillage Type: Conventional
Irrigation: None
Rainfall: 26.11 inches
Population: 34,000 plants per acre

Fertilizer Applied: Fall applied NH₃ at 100 pounds per acre; Spring applied 120 pounds per acre (Urea)
Herbicide: Lumax 2.5 quarts per acre
Insecticide: None

1= Best
10= Worst

Treatments: 1) SoilBiotics **4** Ultra Boost 1 gallon per ton
2) Agrotain Ultra ½ gallon per ton
3) Nutrisphere ½ gallon per ton

- SoilBiotics trial reduced the N rate with the Urea by 25%. 90 lbs/acre of Urea coated with **4** Ultra Boost was applied to the SoilBiotics trial.
- For the Agrotain and Nutrisphere trials, 120 pounds per acre of Urea was applied
- **4** Ultra Boost outperformed Agrotain by 10.07 bushel per acre and Nutrisphere by 11.15 bushel per acre.

Testing conducted by Holdings Agronomy Services
